

WEBSITE SECURITY & COMPLIANCE ASSESSMENT

Identify vulnerabilities. Reduce risk. Strengthen compliance.

King Solutions helps businesses uncover website security weaknesses, understand exposure, and build a prioritized path toward remediation and ongoing protection.

THE RISK

Website weaknesses can expose sensitive information, enable unauthorized access, and create avoidable security and compliance concerns.

- Data Encryption Gaps**
Unprotected data can be intercepted in storage or transit.
- Cookie & Session Security**
Weak session controls can enable hijacking and account takeover.
- Injection Vulnerabilities**
Poor input validation can expose applications and databases.
- SSL/TLS & Security Gaps**
Missing certificates, headers, or hardened settings increase exposure.
- Legacy Pages & Architecture**
Forgotten pages and dead links can hide outdated vulnerabilities.

AVERAGE TIME TO IDENTIFY A
BREACH

WHAT WE ASSESS

- Data encryption - transit & at rest
- Cookie security & session handling
- SSL/TLS configuration & certificates
- Web application firewall configuration
- SQL injection & input validation
- Access control & authentication
- Site architecture & dead-link audit
- Payment processor / PCI-DSS

RELEVANT FRAMEWORKS

PCI-DSS | GDPR | CCPA | ADA

WHAT YOU RECEIVE

01 Security Assessment Report

Risk-ranked findings with severity levels and CVSS scores.

02 Remediation Roadmap

Prioritized actions with timelines and implementation complexity.

03 Compliance Documentation

A practical checklist for applicable security and compliance considerations.

04 Implementation Guidance

Plain-language explanations with code or configuration examples.

ONGOING PROTECTION

- Continuous vulnerability scanning
- Security patch updates
- SSL/TLS certificate monitoring
- Malware detection & alerts
- 24/7 threat notifications

Optional monitoring and support can help maintain security after remediation.

FROM FINDING VULNERABILITIES TO FIXING THEM

King Solutions translates technical findings into prioritized, understandable actions - so leaders know what is wrong, what matters most, and what to do next.

RELEVANT SECURITY CERTIFICATIONS

**KNOW WHERE YOUR WEBSITE IS VULNERABLE
BEFORE AN ATTACKER DOES.**
